## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Travalent et al (US 4,246,898).

Travalent teaches a syringe (10) with pushrod (22), a scale (60), threads (see claim 3, and 54, Fig 1), a stop (56) moveable relative to the scale along the shaft of the pushrod, the shaft including a thumb rest (32) and the syringe barrel having a flange (24) which abuts the stop (Fig 1). The shaft is made of plastic, which is generally molded. Also, molded is a product-by-process limitation and is given little patentable weight.

3. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Blackman (US 4,466,426).

Blackburn teaches a syringe (10) with known volume (scale 38 and 40) with pushrod (20), a scale (lines at 32a and 32b), threads (see 32a, 32b, and 36e), a stop (36) moveable relative to the scale along the shaft of the pushrod, the shaft including a thumb rest (24) and the syringe barrel having a flange (28) which abuts the stop (Fig 1). The shaft is made of metal, which may be molded. Also, molded is a product-by-process limitation and is given little patentable weight.

***Response to Arguments***

4. Applicant's arguments with respect to claims 1-11 have been considered but are not persuasive. Travalent teaches that the syringes have a known diameter and that this diameter is taken into account when selecting the scale of the plunger (Col 3 line 57-Col 4 line 14). This indicates that the volume of the syringe is known based on the diameter of the barrel and the plunger corresponds to that specific volume for metered dosage.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
